Advanced expertise in miniature 3CCD prism technology enables the smallest, lightest 3CCD color camera systems available today. These designs are focused on versatility, high-resolution imaging, rugged mechanical and easy-to-install features to provide added flexibility for applications in medical, broadcast, machine vision, microscopy, endoscopy, and non-destructive testing.

EXTREME LOW-LIGHT COLOR CAMERA

provides sensitivity and dynamic range in excess of current generation night-vision cameras and offers full color at 30 frames per second - in near total darkness!

TRUE HIGH-DEFINITION 3CCD CAMERA

provide the sharpest, clearest, true-color imagery available in the most compact HD camera on the market.

SINGLE CCD REMOTE HEAD CAMERA

Versatile and powerful, this system delivers excellent image resolution, and its compact dimensions provide for greater flexibility in mounting choices.

3CCD PRISM BLOCK COLOR CAMERA

provides the best in color fidelity and boasts 800 lines of TV resolution.
