

SimplexGrinnell orders additional American Innovations' X-Ray Inspection Systems

Source: American Innovations, Inc. News Room

June 26, 2007 (Spring Valley, NY) - American Innovations, Inc. received additional product and services contracts from SimplexGrinnell (Tyco International) for multiple AI CXIS-2517 computerized x-ray inspection systems for one of their government customers. The referenced x-ray inspection systems will be combined with walk through metal detectors also to be supplied and installed by AI. These security checkpoints are an integral component to the total security solutions being provided by Simplex Grinnell. Installation, operator training, and support services will be provided by American Innovations, Inc. directly to the government agency. The agency and facility locations have been withheld to protect the privacy of the end users.

American Innovations, Inc. is honored to have the opportunity to expand their working relationship with SimplexGrinnell and appreciates the confidence they have placed in our team to satisfy these important security requirements.

About SimplexGrinnell:

SimplexGrinnell is today's premier systems integrator for designing, commissioning and maintaining large Windows®-based security solutions. SimplexGrinnell has the resources and the Microsoft-certified expertise to provide a complete enterprise solution for virtually any large-scale systems integration application, from college campuses, hospitals and corporate headquarters to office towers, petrochemical plants and manufacturing facilities. With its exceptional systems integration capabilities, SimplexGrinnell is able to bring multiple systems together into a seamless integrated security environment that can be managed from one point of control.

About American Innovations, Inc:

American Innovations, Inc. is a minority, woman owned small business serving Government and military agencies, defense contractors, system integrators, corporations, and high profile venues. AI provides the means to safeguard people, facilities, and high profile assets through strategic planning, an array of advanced technologies, and policy implementation. Loss prevention and visual inspection requirements are additional applications satisfied with AI's technologies and services. Securing critical infrastructure, protecting soldiers and civilians, and delivering solutions for challenging requirements are primary objectives of AI. Delivering total solutions which combat evolving threats has been instrumental in the growth of American Innovations, Inc.
