

## **American Innovations demonstrates XD-2i Explosives Detector at MARCORSYSCOM Small Business Conference**

**November 19, 2009 (Fredericksburg, VA)** - On November 19, 2009, American Innovations, Inc. demonstrated the XD-2i Portable Explosives Detector at the first Marine Corps Systems Command (MARCORSYSCOM) small business conference held at the Fredericksburg Convention Center in Fredericksburg, VA. Participants were fortunate to learn of MARCORSYSCOM needs directly from General Michael Brogan, Commander, Marine Corps Systems Command; among other distinguished speakers from the Marine Corps and Navy.

Marines and personnel at MARCORSYSCOM learned how the XD-2i Explosives Detector could add a tactical advantage through increased field detection and identification of explosives and attacking the network of terrorists involved in the storage, making, assembling handling, transportation and emplacement of explosives and IEDs.

American Innovations offered demonstrations and instruction on the XD-2i Portable Explosives Detector, a lightweight, fast and easy to use explosives detector that can detect all commercial, military and homemade explosives, trace and bulk, in a single sample. Explosives Detection experts as well as front-line Marines were impressed with the broad capabilities offered by the XD-2i and with the fact that this explosives detector requires no warm-up, no calibration, and no clear-down after detection. Equally important to the Marines was its size, ability to run 200 plus tests on commercially available AA batteries, and not false positive on common interferences and masking agents problematic to many other explosives detectors being issued to our Marines in OEF, OIF, and other areas of conflict.

American Innovations was grateful for the opportunity to participate at the MARCORSYSCOM small business conference and looks forward to participating at future MARCORSYSCOM events. Marines, be safe and thank you always for your service and sacrifices.
