

DHS Transportation Security Lab (TSL) completes an assessment of XD-2i Explosives Detector

Source: American Innovations, Inc. News Room

December 5, 2007 (Atlantic City, NJ) - The Department of Homeland Security Transportation Security Lab (DHSTSL) located in Atlantic City, NJ has recently completed an assessment of the American Innovations XD-2i, portable explosives trace detector.

The performance capabilities of the XD-2i can be verified directly from DHSTSL by recognized government agencies. Private sector counterparts in the need to know should contact their State Office of Homeland Security (OHS) who can verify the explosives detection capabilities of the XD-2i with the Transportation Security Lab on their behalf.
